District*

The Aquatic Habitat Guidelines Program (AHG) is pleased to announce the availability of the ***Stream Habitat Restoration Guidelines (SHRG)*** in hard copy. SHRG is an important contribution to the management of Washington State's stream corridors for protection and restoration of fish and wildlife habitat. It is a guide for planning, design, and ecological considerations for process based natural stream habitat restoration. It includes methods for restoring the natural supply of sediment, water, and wood to the stream; water quality; habitat connectivity; and habitat diversity.

The Aquatic Habitat Guidelines is a series of guidance documents currently being developed to facilitate marine and freshwater habitat protection and restoration through the consistent application of good science for design, construction, and operation of projects affecting aquatic systems. The guidelines are being prepared through the cooperation of the Washington State Departments of Fish & Wildlife, Transportation, Ecology, with grants provided by the Salmon Recovery Funding Board and the US Environmental Protection Agency.

To receive your copy reply by mail. Copies of ***Stream Habitat Restoration Guidelines*** may be purchased from the Washington Department of Fish and Wildlife at a cost of \$40.00 (prepaid, postage included).

To order, please send payment to:
